

Time Display and Validation pattern is time{H:MM}

Placeholder

Before 15:00

On or after 15:00

```
// form1.page1.timeReceived::exit - (JavaScript, client)

form1.page1.before.rawValue = "";
form1.page1.after.rawValue = "";

var timeStr = form1.page1.timeReceived.rawValue;
if (timeStr < 1500) {
    form1.page1.before.rawValue = timeStr;
}
else {
    form1.page1.after.rawValue = timeStr;
}
```
