

Import the AemFormsSamples using packagemanager

Unzip the SampleFiles.zip into C:\AemFormsSamples

To run the sample AS IS you will need to create a folder called AemFormsSamplesOutput under C drive

Import the eclipse project into your eclipse environment. The eclipse project assumes you are running AEM on localhost:4502 with admin/admin as username and password. If these have changed you can modify the code in eclipse

Unzip ApacheHttpClientJarFiles.zip to your hard drive

Add the jar files unzipped to your eclipse project

Right click on TestAemFormsSamples.java and select Run As | Java Application
